Career Objective:

To excel and grow in the sphere of IT in power App by working with such a growing organization, which gives me better opportunity to prove my skills & rewarded to fulfill my dreams as well as of organization.

Experience Summary:

Company : Bitscape Infotech Pvt. Ltd.

Designation : Associate Software Engineer – Business Application (Power App)

Microsoft Dynamic 365:

Excellent experience and very good product knowledge on the below technologies,

- Knowledge of power app (Model – Driven App)
- Good knowledge in model- driven app & work in CRM Form which includes : Dashboard, View, Chart.
- Hands on experience in dynamic 365 portal management, CRM.
- Excellent knowledge about web page, entity form, web role, entity permissions

Certifications:

- ✓ MS Azure – (AZ-900) Microsoft Azure Fundamentals.
- ✓ MS Power Platform – (PL-900) Microsoft Power Platform Fundamentals.

Education :

Exam Passed	Year	University	Subject	Percentage
M.TECH	2019	RTMNU Nagpur	Electronics	76%
BE (ETC)	2015	RTMNU Nagpur	Electronic & Telecommunication Engineering	68%
Higher Secondary School Certificate	2011	Maharashtra Board of Secondary & Higher Education	Science	62%
Secondary School Certificate	2009	Maharashtra Board of Secondary & Higher Education	Common	73.38%

Training & Internship :

Organization Name	Duration	Learning Outcomes
Career Hub	1 Month	Amazon Web Services using Deployment of real time application on amazon using around 15 services.

Academic Projects :

Project Name	Learning Outcomes
IRIS Based Security System using MATLAB.	A biometric system provides automatic identification of an individual based on a uniqueness feature and this system works in MATLAB. It is a highly security facility. This system in CASIA database and is shortly described by this open-source system and iris pattern saved in a database and new iris pattern is comparatively in match and otherwise no match. This project is completely software.

M. Tech Projects :

Project Name	Learning Outcomes
Digital Image Watermarking via Adaptive Logo Texturization.	Grayscale logo watermarking is a quite well-developed area of digital image watermarking which seeks to embed into the host image another smaller logo image. The key advantage of such an approach is the ability to visually analyze the extracted logo for rapid visual authentication and other visual tasks. However, logos pose new challenges for invisible watermarking applications which need to keep the watermark imperceptible within the host image while simultaneously maintaining robustness to attacks. This paper presents an algorithm for invisible grayscale logo watermarking that operates via adaptive texturization of the logo.

Basic Knowledge :

- ✓ AWS
- ✓ Azure

Personal Details :

Fathers Name : Shri. Dinanath Ghatole
Mothers Name : Smt. Jayshri Ghatole
Date of Birth : 24-sept-1993
Languages known : English, Hindi, Marathi.

Declaration :
